
References

In this reference list the arrangement is alphabetical by author surname for works by sole authors and dual authors. Where there are references that include the first-named author with others, the sole-author works are listed chronologically first, followed by the dual author references (alphabetically) followed by the references with three or more authors listed *chronologically*. Chronological order is used within each group of identical authors.

Acland, H.C. (1898) On a Volcanic Series in the Malvern Hills near the Herefordshire Beacon. *Quarterly Journal of the Geological Society of London*, 54, 556–63.
