
WLGS 6 Seafield Law (P-RIGS) [NT 005 667] (Figure 29), (Figure 30)

[WLC site description](#)

[Part of the Strathclyde Group sites](#)

Other designations: WS (Easter Inch Moss)

Seafield Law is unique in that it has been re-profiled to replicate one of the most distinctive natural landforms of West Lothian — a 'crag and tail' feature sculpted by the erosive power of successive glaciations during the Quaternary.
