## Site no.: Q10

**Site name:** Coire Cas-eagallach

**Grid reference:** [NN 97637 73595]

**Locality:** Coire Cas-eagallach, on the eastern side of Beinn a' Ghlo

**GCR Status:** N/A

**GCR No.:** N/A

**Type:** Landform assemblage

**Description:** Small pristine corrie with bouldery terminal moraine and possible relict rock glacier deposit

**Justification:** Good example of a corrie that most would agree was probably last occupied by ice during the Loch Lomond Stadial, unlike others in the Cairngorm and Gaick
