## Site no.: Q17

**Site name:** Chreagdhubh Lodge panorama

**Grid reference:** [NN 67769 95136]

**Locality:** Strathspey in the vicinity of Chreagdhubh Lodge and the Woods of Glentruim, 5 km SW of Newtonmore.

**GCR Status:** N/A

**GCR No.:** N/A

**Type:** Landform assemblage

**Description:** A suite of pristine glacial, fluvioglacial and alluvial features, including eskers, kettleholes and kame terraces.

**Justification:** This visually attractive suite of features is visible from the Cluny's Cave carpark, where a interpretive display board could be erected. The landforms were mainly formed at the snout of an outlet glacier, flowing from the west, that existed for a while during ice-sheet deglaciation.
